

L&T MHI JV Inaugurates Twin Facilities for Power Equipment Manufacture at Hazira,

than 18 months. The Hazira facility is India's largest integrated manufacturing complex for the production of fuel efficient and environmentally friendly supercritical generation equipment".

Mr. Hideaki Omiya, President, MHI, commented, "Mitsubishi Heavy Industries is one of the leading companies in the world with proven designs for high-capacity supercritical boilers and turbine generators. MHI's boilers and turbine generators are among the world's best for supercritical ratings of 660 MW and above. MHI's boilers and turbine generators have established worldwide working references spanning over 25 years. In India, we see a nation that is poised to take a strategic position in international business in the coming years. And in L&T, we have a company which has the drive, ambition and ability to shape that dream to reality. Our partnership with L&T for this venture essentially is all about the coming together of two organizations that are world leaders in engineering excellence as well as committed to the cause of reducing the environmental burden."

L&T's association with the construction of gas and coal based power plants in India and abroad spans six decades. The company delivers the widest spectrum of engineering solutions; full EPC or customized offerings, Supercritical BTG Island, Supercritical Boiler Island, Supercritical Turbine Generator Island and Complete BoP. In addition to an excellent track record of timely completion of projects with good quality and safety records, the company has been lauded for its efforts in the field of Occupational Health and Safety with several domestic as well as international awards. L&T has successfully executed projects for public sector units, state electricity boards and independent power producers.
