L&T Construction Secures AED 943.11 Mn Abu Dhabi Airport Order

Mumbai, April 03, 2013: The Transportation Infrastructure Business of L&T Construction has won an order worth AED 943.11 Mn for the development of the prestigious Midfield Terminal Complex - an airside construction project for Abu Dhabi Airports Company PJSC, UAE.

Work on the Midfield Terminal Complex (MTC) is part of the major expansion programme of Abu Dhabi International Airport. It consists of a Midfield Terminal Building (MTB) and related airside and landside work. The MTB will serve as the new gateway to Abu Dhabi.

L&T will build concrete hard stands for aircraft parking around the new Midfield Terminal Building, including contact and remote stands. The airside works also include taxi lanes along the apron parking stands and link taxiway connections to the existing airside infrastructure with a tunnel on the airside. The major item of works for the airside include earthwork, concrete pavement, asphalt pavement with markings, drainage, general utilities, airfield ground lighting, gate services such as flood lighting, visual dock guidance system and structural works/systems for airside tunnel. The project also includes Aircraft fuel hydrant system, storm & portable water distribution line, chilled water distribution system, medium voltage distribution Sub-Stations, communication network and fire main distribution system on the major utility segments.

The Project will commence in April 2013 with a construction period of 28 months. The Airport Terminal Complex is expected to be commissioned by 2017.
