

L&T Announces Strategic Partnership with E2E Networks to Accelerate Cloud and AI Innovation for Indian Enterprises

Mumbai, November 05, 2024: Larsen & Toubro (L&T), India's premier tech-led conglomerate, has announced a strategic partnership with E2E Networks, an 'Indian Cloud and AI Cloud' provider. The partnership is a significant step towards the adoption of GenAI solutions in India to foster a fundamental shift in the way Accelerated Computing on Cloud is used by Indian organisations.

The transformative journey for organisations in AI adoption is a fundamentally different approach to implementing GenAI software solutions using Cloud GPUs to utilise an organisation's deep learnings to deploy and evolve production-grade self-adapting AI Software.

L&T will also acquire a 21% equity stake in E2E Networks. The Office of the Director of India has changed from being viewed as a digital colony to that of evolving into a provider of sovereign cloud platforms to the world."

Ms Seema Ambastha, Chief Executive of L&T Data Centre and Cloud Business, emphasised the importance of the partnership, saying, "Collaborating with E2E Networks allows us to offer our clients seamless, scalable and secure cloud experiences. By combining our capabilities, we are delivering a cloud ecosystem designed for businesses in India that want

to drive growth, optimise costs and unlock the full potential of AI and digital transformation.”
